

Thank you for using our extension. Please follow these instructions to proceed with the installation of your extension:

#1 Installation:

1. Extract Extension.
2. Using your FTP client upload app, js directories to your store root. This would not overwrite any files, just add the extension to its folder.
3. That's all.

#2 Implement

Set Up New Facebook Application at <https://developers.facebook.com/apps>

1. Click on "Create New App" button

A screenshot of the Facebook Developer Portal interface. The page title is "Apps > Connector". There are two buttons at the top right: "Edit App" and "+ Create New App". The "+ Create New App" button is highlighted with a red rectangular box, and a red arrow points to it from below. Below the buttons, there are sections for "Settings", "Developer Alerts", and "Insights". The "Settings" section shows "App ID/API Key" as 368992423224260, "App Secret" with a "Show" link, "Sandbox Mode" as "Off", and "Listed Platforms" as "Website with Facebook Login". The "Developer Alerts" section shows "You do not have any developer alerts." The "Insights" section has "Users" and "Sharing" sub-sections. A red text label "Click here to create new app" is positioned below the red arrow.

2. Type in your Application name

Create New App

App Name: [?]

App Namespace: [?] Optional
