1. Introducing Advanced Ajax Cart

The Advanced AJAX Cart extension effectively removes those annoying page reloads that frequently occur when users click “add to cart” and “delete from cart” options. Instead of reloading, items are added instantly with appealing animation effects.

2. Installing Advanced Ajax Cart

1. Extract Extension.
2. Using your FTP client upload app, js, skin directories to your store root. This would not overwrite any files, just add the extension to its folder.
3. That's all.

4. Uninstallation

1. If you require to disable the extension without removing it completely, go to System->Configuration->Advanced->Advanced->Disable Modules Output and disable the module OnlineBiz_Flycart. Also, the extension can be switched off following steps without deleting the files of the extension.
 - Login to your FTP, navigate to app/etc/modules/
 - Open the file OnlineBiz_Flycart.xml and change the following line:
From
`<active>>true</active>`
To
`<active>>false</active>`
 - Clear the cache under var/cache.

If you are unable to access the extension settings in the backend, please logout and login once and try again.

But if installation requires some customization based on theme/layout then we will charge you for extra work.
Hope you can understand this.

Sincerely, OnlineBizSoft Team
