## 5. Uninstallation

1. If you require to disable the extension without removing it completely, go to System->Configuration->Advanced->Advanced->Disable Modules Output and disable the module OnlineBiz\_Medicine. Also, the extension can be switched off following steps without deleting the files of the extension.
  - Login to your FTP, navigate to app/etc/modules/
  - Open the file OnlineBiz\_Medicine.xml and change the following line:  
From  
`<active>true</active>`  
To  
`<active>>false</active>`
  - Clear the cache under var/cache.

If you are unable to access the extension settings in the backend, please logout and login once and try again.

But if installation requires some customization based on theme/layout then we will charge you for extra work. Hope you can understand this.

Sincerely, OnlineBizSoft Team
