## 1. Introducing One Step Checkout

The One Step Checkout extension for Magento is a must-have module that simplifies the checkout process and makes it much easier and faster for customers to buy products at your store.

## 2. Installation

1. Extract Extension.
2. Using your FTP client upload app, js, skin directories to your store root. This would not overwrite any files, just add the extension to its folder.
3. That's all.

### 3. Configuration

Configuration options are available in administration panel: **System --> Configuration --> OnlibeBizSoft --> One Step Checkout.**

1. General settings
  - Enable: Enable/Disable output on front-end
  - License Key: Extension license key
  - Onestep Checkout in Cart: Allow Checkout process directly on cart page.
  - Allow Guest Checkout: Allow Guest Checkout.
  - Display Discount Coupon: Display Discount Coupon.
  - Checkout Title: Here you can set the title of your checkout page.
  - Checkout Description: Checkout Description(display on checkout page as additional info).
  - Default Country: Default Country.
  - Default Shipping Method: This option allows to define what Shipping Method will be selected on the checkout page by default. Note, a customer will still be able to select any other available Shipping method.
  - Default Payment Method: This option allows to define what Payment Method will be selected on the checkout page by default. Note, a customer will still be able to select any other available Payment method.
  - Checkout Page Style: Checkout Page Style(support 2 and 3 columns style).

## 4. Uninstallation

1. If you require to disable the extension without removing it completely, go to System->Configuration->Advanced->Advanced->Disable Modules Output and disable the module OnlineBiz\_OneStepcheckout. Also, the extension can be switched off following steps without deleting the files of the extension.
  - Login to your FTP, navigate to app/etc/modules/
  - Open the file OnlineBiz\_OneStepcheckout.xml and change the following line:  
From  
`<active>true</active>`  
To  
`<active>false</active>`
  - Clear the cache under var/cache.

If you are unable to access the extension settings in the backend, please logout and login once and try again.

But if installation requires some customization based on theme/layout then we will charge you for extra work. Hope you can understand this.

Sincerely, OnlineBizSoft Team
