## 1. Introducing Product Navigation

Previous Next Item Navigation help your customer viewing your items easily and, without going to category or search results page that they visited from. All they have to do is to click on the next/previous link on the product details.

## 2. Installation

1. Extract Extension.
2. Using your FTP client upload app, js, skin directories to your store root. This would not overwrite any files, just add the extension to its folder.
3. That's all.

## 3. Configuration

Configuration options are available in administration panel: **System --> Configuration --> OnlibeBizSoft --> Previous/Next Item.**

## 4. Uninstallation

- If you require to disable the extension without removing it completely, go to System->Configuration->Advanced->Advanced->Disable Modules Output and disable the module OnlineBiz\_Prevnext. Also, the extension can be switched off following steps without deleting the files of the extension.
  - Login to your FTP, navigate to app/etc/modules/
  - Open the file OnlineBiz\_Prevnext.xml and change the following line:  
From  
`<active>true</active>`  
To  
`<active>>false</active>`
  - Clear the cache under var/cache.

If you are unable to access the extension settings in the backend, please logout and login once and try again.

But if installation requires some customization based on theme/layout then we will charge you for extra work. Hope you can understand this.

Sincerely, OnlineBizSoft Team
